Full Stack Web Developer with hands-on experience in maintaining production web applications, integrating content management features, and collaborating in agile development environments.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, Java, C, BASH

Frameworks, Libraries & Databases: React, Node.js, PostgreSQL, Tailwind CSS, Angular

Tools & Other Technologies: Git, Github, Webpack, Jest, npm

WORK EXPERIENCE

Cosminder Solutions Private Limited

June 2025 - December 2025

Full Stack Web Developer

- Maintained and extended core functionality of the company's primary website, improving stability, responsiveness, and user experience across desktop and mobile devices
- Developed and integrated a blog management feature, enabling dynamic content creation, editing, and publishing through a structured backend workflow.
- Refactored existing codebase to improve readability, performance, and long-term maintainability.

Grippi.io

November 2024 - April 2025

Full Stack Web Developer Intern

- Assisted in the implementation of AI-driven notification systems for WhatsApp and Slack, automating the delivery of performance anomalies and marketing insights.
- Assisted Integration of third-party APIs from platforms like Meta, Google Ads, and Shopify to aggregate real-time marketing data into a centralized analytics engine.
- Helped develop interactive data visualization components and dashboards to help users track key performance indicators (KPIs) and ROI across multiple channels.

PROJECTS

Travel Planner - HTML, CSS, JavaScript, React, TypeScript, Express.js, PostgreSQL

- Developed a user-friendly web application for travel planning, allowing users to create and manage their itineraries.
- Utilized Redux for state management, enabling efficient data flow and improved application performance.
- Designed RESTful APIs using Node.js and Express.js, facilitating data retrieval and storage from the PostgreSQL database.
- Implemented JWT-based authentication to ensure secure user registration and login processes.

Code: [Demo](#):

Web based Scientific Calculator - HTML, CSS, JavaScript(Vanilla)

- Built a web-based clone of the GNOME Calculator, replicating standard, scientific, and programmer calculation modes
- Delivered a pixel-accurate UI aligned with GNOME design principles for a native-like user experience
- Implemented real-time expression evaluation with precise numerical handling
