Siddhartha Suman

Next.js Developer · Full Stack Web Developer

9835324548 · India · **siddharthasingh21109572@gmail.com** | **Portfolio** | **LinkedIn** | **GitHub**

Next.js developer who ships production AI products end to end — real-time collaborative tooling, voice-AI interfaces, full auth and billing — on the App Router, React Server Components, and modern edge-deployed architecture.

Technical Skills

Next.js / React	App Router, Server Components, Server Actions, TypeScript, Tailwind CSS, Zustand
Backend & Data	Node.js, Express, PostgreSQL, MongoDB, Mongoose, Convex
AI & Realtime	Anthropic Claude API, Vercel AI SDK, Google Gemini API, Vapi, ElevenLabs, Inngest
Platform & Tooling	Vercel, Clerk, Git, Webpack, Jest, Sentry

Projects

Turbo — AI-Powered Cloud IDE

Next.js 16 (App Router) · React 19 · TypeScript · Convex · Inngest · Vercel AI SDK · WebContainer API · Clerk · Sentry

- Built a full-stack cloud IDE on the Next.js App Router with real-time collaborative editing and AI-powered code suggestions via the Anthropic Claude API
- Architected real-time sync and background job processing with Convex and Inngest, supporting concurrent multi-user sessions without blocking on AI response time
- Ran code execution client-side via the WebContainer API, removing the need for sandboxed server infrastructure and cutting execution latency

DeepRead AI — Voice AI Book Companion

Next.js 16 (App Router) · React 19 · TypeScript · MongoDB · Mongoose · Clerk · Vapi · ElevenLabs · Google Gemini API

- Built an AI-powered book companion on Next.js enabling real-time voice conversations with PDF books, using intelligent text extraction and chunking for accurate context retrieval
- Integrated Vapi for low-latency conversational audio and ElevenLabs for lifelike text-to-speech, with multiple selectable AI voice personas
- Designed full-stack architecture with Clerk authentication, subscription billing, and a Mongoose-based schema supporting multi-user libraries and persistent conversation history

Work Experience

Cosminder Solutions Private Limited — JUNE 2025 – PRESENT

Full Stack Web Developer

- Maintained and extended the company's primary Next.js website, improving Core Web Vitals and cutting page load time by ~25% through code splitting and image optimization
- Built and shipped a blog management feature end to end, cutting average content publishing time from hours to minutes for the non-technical content team
- Refactored core sections of the codebase, reducing duplicate logic by ~30% and shortening onboarding time for new contributors

Grippi.io — NOVEMBER 2024 – APRIL 2025

Full Stack Web Developer Intern

- Helped build AI-driven Slack and WhatsApp notification systems, cutting the time to surface marketing performance anomalies from daily reports to near real-time alerts
- Contributed to third-party API integrations (Meta, Google Ads, Shopify), consolidating data from 3+ platforms into one centralized analytics engine

Education

Sido Kanhu Murmu University — 2022

B.Sc Honors, Physics — Dumka, Jharkhand
